VeriTread

Senior QA Engineer

Description

VeriTread is looking for a passionate Senior QA engineer to help with our web-based products. You must be a team player that gets involved with all aspects of development and must have launched products.

Responsibilities:

- Develop and execute test plans/ test cases for web apps, REST services, and SQL database, performance in an AWS environment.
- Perform smoke/sanity, functional, regression, integration, deployment, browser compatibility testing on a continuous basis.
- Deploy code to Kubernetes pods, be able to make CI/CD edits to code, and push code to all environments.
- Document issues in a comprehensive manner from both end user perspective and from development perspective.
- Develop and execute templates, tools, metrics, and best practices for a scalable continuous delivery model.
- Be the gatekeeper from Quality, Company, and End user perspective.
- Problem solve & provide data to upper management to help make decisions.

Requirements for the Position:

- Minimum of 5-7 years of overall software development and/or QA experience
- Bachelor's degree or higher in Computer Science, or related technical field.
- Must have experience testing SQL tables and stored procedures, and scripting beyond basic Select statements.
- Must have experience testing Web apps and REST services using tools like SoapUI/ Postman
- Demonstrated experience with Kubernetes pods, cron jobs and infrastructure as code.
- Must understand development and QA lifecycles.
- Experience with code reviews is a big plus.
- Experience with test case management, defect management, configuration management tools
- Experience implementing and understanding of load/performance planning, testing using various tools/ technologies is a plus.
- Excellent analytical and problem-solving skills with attention to detail
- Strong oral and written communication skills
- Passion for learning, be a strong QA tester.
- Understanding of networking and security

We prefer that you are in Chicago area for this position. However, this position is work from home, but you should be willing and able to come to an office for initial on-boarding and periodic project related meetings. You must have demonstrated experience launching products in a remote setting and be self-managed.
